

# 2017-18 Behavior Education Plan Data Report Supplement

This report serves as a review of the action steps taken at the close of the 2017-18 school year and through the summer of 2018, including progress made on implementation plans and action steps in support of the Behavior Education Plan. This is a supplement to the data review of behavior incidents from the 2017-18 school year.

## Implementation Progress

- Prioritized school decision-making through Culture and Climate funding by **making \$100,000 in Behavior Education Plan funds available to support schools**. Schools submitted proposals on how they would use funds. Some of the projects included:
  - **West High School launching Start on Time** to address tardiness
  - **Leopold Elementary focusing on social emotional learning** by pulling together a team for summer-long planning in developing systems of support for students
  - **Many schools using funds to offer extended employment to staff** for continuous planning that carried through the summer
- Provided **trainings for mobile response teams to improve implementation of proactive systems and specific policies**, such as Act 143, Board of Education Policy 4400 and the new procedures for fighting/physical attack. This ensured system alignment to policies.
- **Engaged a new cohort of schools in restorative practice** while deepening learning for previous cohorts and maintaining our partnership with the YWCA. **Expansion of YWCA allocation to support for Badger Rock Middle School began in September 2018.**
- **Analyzed data related to lower level violations** of the Behavior Education Plan and reviewed the intersection of bullying and harassment in relation to refusing to cooperate and repeated classroom disruptions.
- **Held trainings and institutes related to Developmental Designs, Welcoming Schools, Restorative Practices, Mindfulness and Social Emotional Learning** to further develop school team capacity to support universal systems.
